Software Developer | IT Support Specialist

SUMMARY

As an Entry-level Software Developer, I bring a solid foundation of technical skills and a passion for problem-solving to any team. With a commitment to continuous learning and a dedication to delivering high-quality work, I am excited to contribute my skills to a dynamic and collaborative IT environment.

EXPERIENCE

Discord Chatbot, Nakuru, KE — *Software Developer*
September 2023 - December 2023
Engineered a versatile Discord chatbot using Python, Kaggle, Jupyter Notebooks, Hugging Face, and Uptime Robot. The chatbot is customizable for various purposes based on the dataset used, showcasing adaptability and innovation.

Travel Companion App, Nakuru, KE — *Software Developer*
September 2023 - December 2023
Developed a Travel Companion application using JavaScript, ReactJS, CSS3, Axios, Trip Advisor API, and Google Maps API. The application caters to students planning to travel, helping them explore nearby restaurants, hotels, and attractions.

Nakuru Law Courts, Nakuru, KE — *ICT Support Attachee*
May 2023 - August 2023
As an ICT Attache at Nakuru Law Courts, I undertook a dynamic role encompassing a wide array of responsibilities in network and system administration, project collaboration, ICT management, user support, software installation and troubleshooting.

Quick Food Application, Nakuru, KE — *Software Developer*
January 2023 - March 2023
Built a full stack online food delivery application using PHP, Laravel, and
